

BLOCKCHAIN INNOVATIONS

TGS-2021010381

SKILLSFUTURE CREDIT - ELIGIBLE

Course Description

Blockchain is the potential next wave of technology revolution to disrupt the way business transactions are conducted. Governments and large corporations are rolling out blockchain initiatives and solutions. It is important for you to keep current on this emerging technology. In this course you will learn about the blockchain technology, analyse the use of it in different business contexts and how to implement blockchain for your business.

Learning Outcomes

After attending this training, you will be able to:

- Analyse the use of blockchain technology in different business contexts
- Evaluate blockchain technology for own business application and innovation
- Develop a proposal to facilitate and implement blockchain to improve business performance.

Prerequisites

- You must be 21 years old and older.
- With either completed at least secondary education or able to speak, listen, write, and read English at a minimum proficiency level of the Employability Skills Workforce Skills Qualification Workplace Literacy Level (WPL) 4

Course Information

Duration: 16 hours (including written and practical assessments)
Mode of Learning: Virtual Classroom

This course is suitable for:

This course is applicable to anyone who is keen to develop a good understanding of blockchain technology. As the course is about applying emerging technologies to a business operational process, the learner should be currently working or has worked before to give him a business context for his training.
